

# The jneurosci package\*

Matthias Hennig (hennig@cn.stir.ac.uk)

2004 April 06

This is a slightly modified version of the namedplus style, which fully conforms with the Journal of Neuroscience citation style.

The following citation labels are implemented:

`\citeauthoryear{<author-info>}{<year>}`: these labels are processed by the following commands:

`\cite{<key>}`: which produces citations with both author and year, enclosed in parens.

`\shortcite{<key>}`: which produces citations with year only, enclosed in parens

`\citeauthor{<key>}`: which produces the author information only

`\citeyear{<key>}`: which produces the year information only

`\citetext{<key>}`: which produces Author (Year)

`\citenoparens{<key>}`: which produces Author, Year

The output looks like that:

`\cite{<key>}`: (Strettoi and Masland, 1996; Kolb, 1997; Masland, 2001) and (Fisher et al., 1975)

`\citetext{<key>}`: for reviews, see McNaughton (1990); Müller and Kaupp (1998); Fain et al. (2001).

---

\*This manual corresponds to jneurosci v1.00, dated 2004 April 06.

The bibliography follows J Neurosci conventions, e. g.:

- Koch C (1999) Biophysics of Computation: Information Processing in Single Neurons Oxford University Press.
- Enroth-Cugell C, Robson JG (1966) The contrast sensitivity of retinal ganglion cells of the cat. J Physiol 187:517-552.

This is a modified version of the namedplus style by:

---

A. David Redish `adr@nsma.arizona.edu`  
Post-doc `http://www.cs.cmu.edu/~dredish`  
Neural Systems, Memory and Aging, Univ of AZ, Tucson AZ

---

which was in turn modified by:

Oren Patashnik (`PATASHNIK@SCORE.STANFORD.EDU`)

and finally modified by:

Matthias H Hennig, University of Edinburgh, `mhennig@inf.ed.ac.uk`
