

## Sectioning commands with critical notes in parallel columns

This file provides examples of using sectioning commands with `reledpar`. The section titles are in the line numbering, and have critical notes.

The left and right sides are put in columns. We use `\eledsectnotoc{L}` to say we want the right titles be added to the table of contents, and not the left titles. We also use `\eledsectmark{R}` to use the right side to add  $\LaTeX$  marks for headers.

We use the `\reledxxx` commands, each of them in their own `\pstart...\pend` group.

Page clearings are manually added before chapter with `\beforeeledchapter`.

# Contents

<b>1</b>	<b>Right chapter</b>	<b>3</b>
1.1	Right section . . . . .	3
1.1.1	Right subsection . . . . .	3
